

22645 - HESS – GEOLOGISTS

E) SENIOR GEOSCIENCE ADVISOR (PORTFOLIO ANALYSIS)

Location: London preferred (Houston possible)
Business Unit: Global New Business Development
Reporting to: Manager – Geosciences

Summary

Global New Business Development (GNBD) is the Functional Group in Hess E&P responsible for Portfolio Management and leadership in acquisitions and divestitures. This is a new, challenging role to participate in strategic analyses and lead geoscience analyses evaluations in GNBD of Hess' portfolio of assets in order to optimise growth of reserves and production and achieve a sustainable portfolio Reserves-to-Production ratio of 10:12.

Responsibilities

- Interface and work with Hess asset teams to understand the basis for estimates of:
 - In place oil and gas volumes
 - Forecasts of production and reserve bookings
 - Associated technical uncertainties
 - Risks and potential upsides
- Support portfolio managers analysing corporate growth potential, obstacles and options to achieve the E&P strategic goals.
- Recommend opportunities and activities within existing assets to achieve the Strategic Goals.
- In partnership with other E&P Functional Groups, identify common attributes of core assets and associated corporate competencies.
- Help diversify and refine Hess' acquisition strategy.

Candidate

- Significant industry experience is necessary. Applicants with a history of diverse technological applications are preferred. It is essential to demonstrate experience in 2 or more of these areas – field development, exploration, production, E&P technology.
- A postgraduate degree in Geosciences from an accredited college or university is required. Consideration may be provided for equivalent industry experience.
