

## **22649 - HESS – DRILLING ENGINEERS**

### **C) SENIOR DRILLING ENGINEER**

Location: Kuala Lumpur, Malaysia  
Business Unit: Drilling  
Reporting to: Drilling Superintendent, KL

#### **Summary**

This role will report to the Drilling Superintendent. The drilling programme presently consists of a one or two well programme which may include testing the well(s). Your primary responsibility will be planning, costing and assisting with operations regarding the well construction, testing and abandonment of these wells in compliance with the Global Drilling Minimum Standards and EH+S Management Systems. This will require close liaison with the subsurface team to ensure effective integration of well programmes in the exploration and potentially overall Belud development plan. Coach and develop direct reports and key contractors.

#### **Responsibilities**

Candidate will work in a drilling and completions team to support Hess drilling operations for the Belud development, based in Kuala Lumpur, Malaysia. Specifically the incumbent will:

- Conduct well design for Belud and other required exploration wells. Ensure that all well plans, designs and well programmes meet defined well objectives, required performance standards, budget and schedule.
- Preparation of scopes of work for tenders and evaluation of tenders.
- Preparation of well cost estimates.
- Day to day operations support during drilling activity.
- Preparing and conducting pre-spud meetings.
- Preparation of drilling programmes and end of well reports.
- Actively participate in promotion of HS&E initiatives.
- Ensure that all well plans, designs and well programmes and regulatory submissions are prepared to and conform with Hess' and legislative procedures and timeframes.

#### **Candidate**

- Experience in Drilling Engineering
- Good knowledge of well planning software.
- Able to work in multi-discipline team.
- Demonstrated ability to coach and develop junior staff and contractors.

- Have a safety orientated culture.
- Experience of Malaysian drilling operations and tendering for well services in Malaysia.
- Experience in Semi drilling operations.
- Good English language communication skills.
- BS or BSc in Engineering or equivalent.
